## "SUBTLE RELAXATION" SPA & WELLNESS

From Body to Mind & From Mind to Body

WE TAKE CARE OF EVERY INCH OF YOUR BODY.

Starting in October, we invite you to the new edition of our SPA "Subtle Relaxation" – a place created for those who wish to care for themselves in a natural, gentle, and mindful way.

Our approach is based on the philosophy of dual-directional influence: from mind to body and from body to mind. We believe that true relaxation begins where body and mind meet in balance.

We specialize in non-invasive treatments that not only nurture the skin and support the body's regeneration but also calm, soothe, and guide you into a state of deep relaxation.

Each session is a subtle ritual – no rush, no pain, no exaggeration.

We invite you to a world where aesthetics meet mindfulness, and relaxation is more than just a moment – it's a way of life.

### DRY SAUNA

A session in the dry sauna takes place at a temperature of approximately 100°C, with very low humidity around 10%. Staying in the sauna helps to detoxify the body, improves circulation, and boosts immunity. We recommend starting your session on the lowest bench; depending on how you feel, you can gradually move to higher levels. The optimal duration for a single sauna session is 10–15 minutes. Afterward, the body should be cooled down (always from the feet and hands toward the heart). The next step is a 15-minute rest in the SPA relaxation area.

For full relaxation in the sauna zone, it is recommended to complete three cycles: heating – cooling – resting.

Towels and bathrobes are available for rent at the hotel reception.

### STEAM BATH

A session in the steam bath takes place at a temperature of 35–55°C, with humidity above 80%. The temperature is lower than in a dry sauna, which allows for longer stays. Steam bath sessions help detoxify the body, accelerate the elimination of harmful metabolic products and toxins, and deeply hydrate the skin. To enhance your experience, you can apply a body wrap (e.g., chalk or pumpkin) or a scrub (e.g., coffee or salt) on the skin.

The optimal duration for a single steam bath session is 10–15 minutes. Afterward, the body should be cooled down (always from the feet and hands toward the heart), followed by a 15-minute rest in the SPA relaxation area. For full relaxation in the sauna zone, it is recommended to complete three cycles: heating – cooling – resting.

Towels and bathrobes are available for rent at the hotel reception.
